Cooperating Technical Community

Task Agreement 99:01 - Redelineation of Floodplain Boundaries Using Updated Topographic Data

In accordance with the CTC Memorandum of Agreement dated June 8, 1999 between the DuPage County and the Federal Emergency Management Agency, Task Agreement 99:01 is as follows:

1. **Objective and Scope:** The objective of this agreement is to redelineate detailed floodplain boundaries in DuPage County. Delineations will be of the 1% and 0.2% annual chance floods and floodway for the flooding sources listed in Attachment A of the effective FIRM and FBFW panels. The flood profiles and floodway data tables from the effective Flood Insurance Study (FIS) reports will be used, in conjunction with Letters of Map Revision (LOMR) which resulted in profile changes, to produce these delineations. These revised floodplain delineations will be used by FEMA to create a Countywide Flood Insurance Rate Map (FIRM) for DuPage County.

2. **Period of Performance:** This Task Agreement will begin on June 8, 1999 and end no later than June 15, 2001. This Task Agreement may be terminated at the option of FEMA or DuPage County in accordance with the provisions of the June 8, 1999 CTC Memorandum of Agreement.

3. **Funding/Cost-Sharing:** DuPage County is willing to perform or contract the required services for an amount not to exceed

4. **Standards:** The following standards and documents are relevant to this Task Agreement:
   - Topographic mapping used to delineate the floodplain boundaries must be more recent and/or detailed than that used to prepare the effective FIRM's for DuPage County Communities. It must be of adequate scale and topographic definition to provide reasonable accuracy and planimetric features must be compatible with the base map (with respect to horizontal accuracy) to be used by FEMA for Digital FIRM production. Topographic mapping taken from aerial photogrammetry or surveys must comply with the requirements of Appendix 4 of FEMA 37. The selection of the topographic mapping source to be used must be coordinated with the FEMA Project Officer prior to analysis and mapping

- Prior to redelineating floodplain boundaries, the effective FIS flood profiles will be evaluated to determine:
  - ♦ Do the flood elevations have discontinuities at community boundaries? In cases where discontinuities exist, engineering procedures will be utilized to provide valid profile information;
  - ♦ Flood profile and cross-sections will be fit to the streamline on the topographic mapping used for this task.
- Work maps must comply with the requirements outlined in Chapter 9 of FEMA 37. The work maps should include the 1% and 0.2% annual chance floodplain boundaries; floodway limits; cross sections; and BFE and Flood Insurance Zone labels.
- Digital mapping submissions must comply with the requirements of Chapter 9 and Appendix 7 of FEMA 37.

5. **Deliverables:** DuPage County shall deliver to FEMA:
   - Digitized topographic work maps depicting the revised 1% and 0.2% annual chance floodplain boundaries; floodway limits; cross sections; and BFE and Flood Insurance Zone labels.
   - Form number 5 of *Revisions to National Flood Insurance Program Maps, Application/Certification Forms and Instructions* (MT-2).

6. **Schedule and Milestones:**

   Milestone 1: Tasks to be completed for the first milestone include:
   - Selection of suitable topographic data for floodplain delineation, including comparison of planimetric features (such as roads) to the base map planned for use by FEMA for Digital FIRM production.
   - Develop a procedure for consolidating and correcting community based FIRM and FBFW panels to a new tetra-section based panels.

   Deliverables for the first milestone include:
   - Documentation of the proposed source of topographic data, including: scale; contour interval; source/methodology; date of survey/data collection; vertical and horizontal datums; and comparison of planimetric features with the Digital FIRM base map planned for use by FEMA.
   - Complete a pilot of Winfield Creek, Tributary to the West Branch of the DuPage River.
   - Schedule for completion of the Countywide FIRM.

   Deliverables for Milestone 1 will be submitted to the FEMA Project Officer no later than August 1, 1999.

Milestone 2 (Final Deliverable): Tasks to be completed for the second milestone include:

- Locate cross sections and flood elevations on topographic mapping.
- Delineate 1% and 0.2% annual chance floodplain boundaries and floodway limits.
- Add BFE and Flood Insurance Zone labels.

Deliverables for the second milestone include:

- Digital Topographic work maps depicting 1% and 0.2% annual chance floodplain boundaries; floodway limits; and BFE and Flood Insurance Zone labels for the remaining watersheds/tributaries in DuPage County.
- Completed form number 5 of *Revisions to National Flood Insurance Program Maps, Application/Certification Forms and Instructions* (MT-2).

Final deliverables will be submitted to the FEMA Project Officer no later than June 15, 2001.

7. **Certification:** The following certifications apply to this Task Agreement (as appropriate):
   - Topographic information must be certified by a registered professional engineer or licensed land surveyor in accordance with 44 CFR 65.5(c).
   - If fill is to be considered in the mapping to raise land areas above the 1% annual chance flood elevation, certification of the fill must be provided in accordance with 44 CFR 65.5(a)(6) by the community's NFIP permit official, a registered professional engineer, or a licensed land surveyor.

8. **Technical Assistance and Resources:** DuPage County may obtain copies of effective FIS hydraulic models, FEMA-issued Letters of Map Change (LOMC), and archived engineering backup data from FEMA's Mapping Coordination Contractor (MCC). The MCC may be contacted at 1-877 FEMA MAP. Specific technical and programmatic support may be provided through FEMA's MCC; such assistance should be requested through the FEMA Project Officer specified in Section 12 of this agreement.

9. **Subcontractors:** Procurement of subcontractors using Federal funds provided as part of this Task Agreement must comply with the requirements of 44 CFR 13.36.

10. **QA/QC Procedures:** The Quality Assurance procedures outlined in Chapter 10 of FEMA 37 should be followed during the development of the revised floodplain boundaries. The mapping should be independently reviewed for compliance with the standards defined in Section 4 of this agreement. FEMA's Technical Evaluation Contractor or others approved by the FEMA Project Officer and the CTC Project Manager will conduct this independent review.

11. **Reporting:** Not Applicable

12. Points of Contact: The FEMA Project Officer is Kenneth Hinterlong and the CTC's Project Manager is J. William Brown, or subsequent personnel of comparable experience who are appointed to fulfill these responsibilities.

Each party has caused this Task Agreement to be executed by its duly authorized representatives.

Robert J. Schillerstrom, County Board Chairman — date 6/8/99

Dale W. Shipley, Director, FEMA Region V — date 6/28/99
